

FIND THE RIGHT CHROME STACK FOR YOUR TRUCK

CSC GROUP AUSTRALIA
THE PARENT COMPANY BEHIND SILVERBACK
AND BLUE DIAMOND

A quick check before fitting. **The truck decides the series**, and fitting the right one is the warranty condition. Start with the year, then confirm on the build plate.

YEAR	THE TRUCK	CAB TYPE	SILVERBACK ARMOUR PREMIUM CHROME	2-YEARS WARRANTY PRODUCT FAILURE	BLUE DIAMOND STANDARD CHROME	1-YEAR WARRANTY PRODUCT FAILURE

CHECK THE BUILD PLATE

Australian Euro 5 is SCR with no DPF — but a few early Euro 5 Cummins ran EGR with one, and if it has a DPF it takes the 650. European makes ran Euro 6 here from around 2017, so a 2019 Scania may already be Euro 6. **Pre-2010 is standard chrome**, flat nose included.

Codes are the 7"×5" × 48" Aussie Curve; the same suffix applies across every profile, diameter and length. Lengths 30"–72", except the 650EXT, carried to 64". The 650 Series is the grade specified for DPF and cab-over exhaust temperatures. **Both warranties cover product failure and require fitment to CSC's recommended application. Check stock before confirming a date.**
